Education

GGSIU - University School of Automation and Robotics

Bachelor of Technology, Artificial Intelligence and Machine Learning (8.8/10 CGPA)

2021 – 2025

New Delhi, India

Govt Boys Sr Sec School

Senior Secondary (PCMB), 86%

2019 – 2020

New Delhi, India

Technical Skills

Programming Languages: Python, C++, C, JavaScript (ES6)

Full Stack Development: MERN, MEAN, React.js, Angular, Node.js, Express.js, HTML5, CSS3, RESTful APIs, JWT, OAuth, Tailwind CSS, Bootstrap

Machine Learning: Scikit-learn, TensorFlow, NLP

Databases: MongoDB, CRUD Operations

DevOps & Tools: Git, Postman, Jupyter Notebook, VS Code, Vercel

Libraries and Visualization: NumPy, Pandas, Matplotlib, Seaborn

Experience

Guru Gobind Singh Indraprastha University

Aug 2023 – Sep 2023

Web Development Intern

New Delhi, India

- Developed a full-stack web application to streamline medical processes, reducing administrative time by 70%.
- Enabled remote patient access for reports and hospital details, improving user experience and accessibility.
- Designed and implemented RESTful APIs using Express.js for optimized communication with a MongoDB database.

Repaio Tech. India

Jul 2024 – Aug 2024

Full Stack Developer

New Delhi, India

- Built and deployed the company's main website using ReactJS, improving online visibility and user engagement.
- Implemented responsive design to ensure seamless experience across devices.
- Enhanced website functionality, performance, and security through full-stack development techniques.

Projects

ListenMusic | MERN, JavaScript, ExpressJS

Source Code

- Created a responsive web-based music player, providing seamless user experience on all devices.
- Implemented core functionalities including playlist management and song playing, login and signup.
- Integrated HTML5, CSS, JavaScript, React, Node.js, MongoDB, and ExpressJS to implement key features.

JobCircle | MEAN, Angular 17, NodeJS, HTML, CSS

Source Code

- Developed a job portal for job search and posting using Angular 17, Node.js, and MongoDB.
- Built RESTful APIs with Express.js to ensure efficient data transfer between the front-end and database.
- Implemented authentication via OAuth to ensure user data security.

Farmer Advisory System | Machine Learning, Python, React

Source Code

- Developed a machine learning-based advisory system to recommend suitable crops, fertilizers, and tools, achieving 95% accuracy.
- Integrated web interface for crop recommendation, fire detection, and disease detection, enhancing user accessibility.
- Integrated React.js front-end with an ML back-end using Flask for seamless interaction.

Courses/Certificates

Supervised Machine Learning: Regression and Classification - Coursera

Certificate Link

Issued Nov 2023

Advanced Learning Algorithms(ML) - Coursera

Certificate Link

Issued Apr 2024

Achievements

2nd Runner-Up in DU Hackathon 2023 for developing an innovative solution in the field of development.
